Glenway Wescott Breaks His Silence

With War Novel APARTMENT IN ATHENS By Glenway Wescott. (Harper;

By Mary-Carter Roberts

The chief thing about this novel is that it marks Glenway Wescott's return to the writing world. The book itself is not any great shakes. At least, it is not to come from the once spectacularly talented pen of its author. It is a war novel and one can say that it is literature. Its merit, however, lies in its workmanship-its structure and its polish-

rather than in any more memorable quality. It shows us Nazis abusing helpless citizens in an occupied state and we all know that Nazis do that and we know pretty much how. Mr. Wescott paints the picture with an artist's brush, but he puts very little in his canvas that is not common knowledge. What has not been such common knowledge is his own career these past 10 years. He, a fortune's child, a very model of the bright young man of the 20s, disappeared from the literary landscape back in 1927 after winning, as a climax to a

meteroic rise to fame, the Harper prize with his novel, "The Grandmothers." There was a subsequent collection of his short stories, but when, a few seasons ago, a novelette, "The Pilgrim Hawk," appeared bearing his name, it was like a voice from the past. One said wonderingly, "Glenway Wescott! Where has he been all this time?" A preface to the work offered his own explanation of his silence. He had say. The novelette, a psychological tremendously. study of love, was a fine piece of

It tells no more than how a small THE OPEN CITY British Army, caught between the sea and a large Germany Army, saves itself by making a forced march inland and taking a strong Italian fort. The march is an agony. It is made at extreme speed and on low water rations. It is strafed by enemy planes and given the gratuitous handicap of a dust storm. Men one soldier to another, of showing, as the title states, "faces in a dusty picture." Out of the scattered pieces of individual suffering we get the whole and get it unforgettably.

But the author disposes of the actual battle very casually. The fort ought to require a terrible assault, for it is immensely strong. Yet it falls, we are told, within a few minutes. Of course, it is an Italian fort. But the reader is apt to feel that Mr. Kersh is a little too realistic on the point. For the sake of his art he really should have made the Eyeties fight.

An Announcement

TO THE READERS OF

The Evening Star

BY SINCLAIR LEWIS

ESQUIRE has asked me to undertake a somewhat different coverage of the subject of books. In its pages, beginning with the June issue, I shall undertake not coverage in the form of tardy reviews of the routine run of books without end, but selective criticism, endeavoring to give attention to authors whom I deem to be of special significance or promise. The aim of this department, then, to follow the text that Esquire has set for my sermons, is to consider certain trends, certain dangers, and certain exciting promises in present-day American literature: to discuss this with unguarded frankness; and not to insult you by being otherwise than completely honest, however indiscreet.

See page 6 of the March issue of Esquire, now on sale, for further details
